Subject index

Ab initio 265
Annulenes 25
Anomeric ratio 99
Area 265
Aromaticity 25
Atomic orbital 133
Atomic valency 67

Basis set optimization 351
Benzenoid hydrocarbons 53,443
Binary alloys 265
Boltzmann equation 357
Bonding nature 303
Bounds failures 351

Calculation of D-glucopyranose conformations 99
Characteristic polynomial 35
Character tables 203
Chebyshev expansion 35
Clar sextet theory 53
Clusters 333
Conjugated circuit 447
Correlation energy 407
Coulomb integrals 239

Density functional 115, 407
Descent and decomposition vectors 89
Design of periodic reactions 143
Dipole moment 357
Dirac-Fock calculations 165
Disilene, Silylsilylene 393
Dispersion forces 257
Dispersion terms 81
Disulfide bond 73
Dynamic electron density 153
Dynamic electron transfer 153

Eigenvalue problems 221
Electronic polarizability 3
Electron-rich systems 17
Electron transfer reaction 153
Explodator 143
Extended Hückel 239, 265

$[Fe(CN)_6]^{n-}$ 429
Finite groups 203

First-row atoms 407
First-row dimers 407
First-row hydrides 407
Free elctron index 67
Frequency-conformation correlation 73

Gases 357
Gaussian type orbital 133
Generalized and irreducible characters 203
Generalized sextet 43
Generalized sextet pattern 43
Generalized sextet polynomial in two elements 43
Graph 35
Graphical invariants 323
Graph theory 53, 323, 365

Hartree-Fock instabilities 25
Hückel theory 323
Hydrogen bond 3
Hydrogen storage 265
Hyperconjugation interaction 73

I-MNDO 3
Infinite chain 227
Instability 17
Ionization potential 3
Ions 357

Kekulé pattern 453
Kekulé structure 43
KHF-graph 447
Kinetic energy 133

Li-CO_2 complex 297
Linearized part 143
Lotka-Volterra model 143

Magnitude of the anomeric effect 99
Majorization 119
Maximal subgroups 203
Mechanism 421
Metal hydrides 265
Methyldiazohydroxide 421
Mixing 203
Mixing character 119
MNDO 3

Molecular orbital 421
Molecular orbitals 239
Molecular orbital valency 303
Moments 323
Momentum density 115
Mössbauer spectroscopy 189
Monomethyl nitrosamine 421
Mulliken-Walsh diagrams 303

Nitrogen systems 17
Nitrosamine metabolism 421
Number of walks 365

Operator 35
Overlap population 73

Parametrization 3
Photoelectron and X-ray spectra 429
Point charge models 257
Point-group representation 333
Polarizability 257
Polycyclic benzenoid hydrocarbon 43
Potential energy surface 89
Potential energy surfaces 297
Pseudo-lattice method 227
Pseudopotential 11, 133, 253

Radial node 133
Reaction barrier height 123
Reaction kinetics 357
Relativistic Gaussian basis sets 165
Rényi entropies 119
Resonance emission 429
Resonance integrals 239

Saddle points of index 2 89
Sandwich complexes 379
SCF interaction energies 81
SCF X α SW 429
Sextet pattern 447
Sites 265
Solvent effect 99
Solvents effect 123
Spectral radius of the adjacency matrix 443
Spherical-shell technique 333
Spin-polarization 429
Split valence 265
Structure factor 35
Structural rule 379
Sulfur 17
Super sextet 447
Surveying technique 265
Symmetry 203

Tetrahedrality 265
Theory of chemical reactivity 89
Tin compounds 189
Titanium 265
Topological index 365
Transition metal complexes 379
Transition metals 265

UHF plus correlation calculations 297
Uniqueness 143

Valence-electron-only SCF 11, 253
Valence state 133
Valency, density matrix definition of ~ 67
Variational stability 351
Variation-perturbation approach 81
Vibrations 333
Volume 265

Water clusters 3
Water dimer 3

Contents volume 70

Agmon N: The method of ascending symmetry for irreducible characters of finite groups 203
Aida M, Nagata C: An *ab initio* MO study on the disulfide bond: properties concerning the characteristic S—S dihedral angle 73
Amos RD, → Somasundram K, et al. 393

Baik DH, Lee YS, Jhon MS: *Ab initio* SCF calculations of the linear infinite chain of LiH according to the pseudo-lattice method 227
Bénard M, Laidlaw WG: Hartree Fock instabilities in the $S_4N_4^{2+}$ dication 17
Bicerano J, Keem JE, Schlegel HB: Theoretical studies of hydrogen storage in binary Ti-Ni, Ti-Cu, and Ti-Fe alloys 265

Castaño O, → Karadakov P 25
Castro EA, → Stradella OG, et al. 67
Chen TS, → Suck Salk SH, et al. 3
Cioslowski J: The spectral radius of the adjacency matrix of benzenoid hydrocarbon 443

El-Basil S: Combinatorial Clar sextet theory. On valence-bond method of Herndon and Hosoya [9] 53

Fowler PW, Quinn CM: σ, π and δ representations of the molecular point groups 333

Gopinathan MS, Siddarth P, Ravimohan C: Valency and molecular structure 303
Grodzicki M, → Männing V 189

Hagen DE, → Suck Salk SH, et al. 3
Hall GG, → Tsujinaga K 257
Hall GG: The evaluation of moments for polycyclic hydrocarbons 323
Handy NC, → Somasundram K, et al. 393
Hariharan PC, → Roszak S, et al. 81
Hárs V, → Tóth J 143
Hässelbarth W: The incompleteness of Rényi entropies 119
He Wenchen, He Wenjie: Properties of „structure factor" of characteristic polynomial and a proof of Hosoya — Randić conjectures 35
He Wenchen, → He Wenjie 43
He Wenchen, → He Wenjie 447
He Wenjie, → He Wenchen 35
He Wenjie, He Wenchen: On-to-one correspondence between Kekulé and sextet patterns 43
He Wenjie, He Wenchen: Topological properties of KHF-graphs and a proof of a one-to-one correspondence between Kekulé and sextet patterns of KHF-graphs 447
Hegarty D: On the Dirac equation in the algebraic approximation 351
Heidrich D, Quapp W: Saddle points of index 2 on potential energy surfaces and their role in theoretical reactivity investigations 89
Hoppe D, → Kleindienst H 221
Hori K, Tachibana A: Dynamic electron transfers in B_2H_6 and $Cu(PH_3)_2(BH_4)$ 153

Irie R: A new one-electron model for extended Hückel type molecular orbital calculations. Linkage of embedded atomic fields 239

Jhon MS, → Kong YS 123
Jhon MS, → Baik DH, et al. 227

Karadakov P, Castaño O: Aromaticity of annulenes and annulene ions with 4v + 2 electrons from the viewpoint of the theory of Hartree — Fock instabilities 25
Kaufmann JJ, → Roszak S, et al. 81
Keem JE, → Bicerano J, et al. 265
Kleindienst H, Hoppe D: A nonadiabatic lower bound calculation of H_2^+ and D_2^+ 221
Kondratenko A, → Naslusov VA, et al. 429
Kong YS, Jhon MS: Solvents effect on S_N2 reactions 123
Kožár T, → Tvaroška I 99

Laidlaw WG, → Bérnard M 17
Lee YS, → Baik DH, et al. 227
Li, Q-s, Yu, H-t, Tang, A-c: Electronic structures of multi-decker transition metal sandwich complexes 379
Lutrus CK, → Suck Salk SH, et al. 3

Männing V, Grodzicki M: Theoretical interpretation of Mössbauer spectra of ^{119}Sn compounds 189
Mark F: Relativistic Gaussian basis sets for the atoms hydrogen to neon 165
Mazalov LN, → Naslusov VA, et al. 429
Montagnani R, Salvetti O: Approximate calculation of the matrix elements of Coulomb and exchange operators for the „core" electrons of the atoms Ga through Kr 11
Montagnani R, Salvetti O: Approximate calculation of the matrix elements of Coulomb and exchange operators for the „core" electrons of the atoms Rb through Cd 253
Moscardó F, San-Fabián E: Covalent-ionic nature of the potential energy surface of the Li—CO_2 complex 297

Nagata C, → Aida M 73
Nath S, Shobha K, Sen KD: Approximate upper bounds to the momentum expectation value ratios $\langle p^2\rangle / \langle p^{-1}\rangle$ and $\langle p\rangle / \langle p^{-1}\rangle$ in atoms 115
Naslusov VA, Kondratenko AV, Neyman KM, Mazalov LN: An SCF XαSW study of the electronic structure and X-ray and photoelectron spectra of Fe(II) and Fe(III) hexacyano complexes in a cluster approach 429
Neyman KM, → Naslusov VA, et al. 429

Parry DE: Molecular states of atoms. II. Orbital wave functions 133
Preuss H, → Savin A, et al. 407

Quapp W, → Heidrich D 89
Quinn CM, → Fowler PW 333

Ravimohan C, → Gopinathan MS, et al. 303
Razinger M: Discrimination and ordering of chemical structures by the number of walks 365
Reynolds CA, Thomson C: *Ab-initio* molecular orbital studies on a new mechanism for the interconversion of monomethylnitrosamine and methyldiazohydroxide 421

Roszak S, Sokalski WA, Hariharan PC, Kaufmann JJ: Procedure supplementing SCF interaction energies by dispersion term evaluated in dimer basis set within variation-perturbation approach 81

Salvetti O, → Montagnani R 11
Salvetti O, → Montagnani R 253
San-Fabián E, → Moscardó F 297
Savin A, Stoll H, Preuss H: An application of correlation energy density functionals to atoms and molecules 407
Schlegel HB, → Bicerano J, et al. 265
Schmidt R, → Stiller W, et al. 357
Schuster R, → Stiller W, et al. 357
Sen KD, → Nath S, et al. 115
Shobha K, → Nath S, et al. 115
Siddarth P, → Gopinathan MS, et al. 303
Sokalski WA, → Roszak S, et al. 81
Somasundram K, Amos RD, Handy NC: Disilene, silylsilylene and their cations 393
Stiller W, Schuster R, Schmidt R: Non-equilibrium rate coefficients and isotope effect with bimolecular ion-(polar) molecule reactions in xenon 357
Stoll H, → Salvin A, et al. 407
Stradella OG, Villar HO, Castro EA: On the density matrix definition of valency 67
Suck Salk SH, Chen TS, Hagen DE, Lutrus CK: A study of hydrogen bond strengths of neutral water clusters $(H_2O)_n$ using modified MNDO 3

Tachibana A, → Hori K 153
Tang A-c, → Li Q-s, et al. 379
Thomson C, → Reynolds CA 421
Tóth J, Hárs V: Specification of oscillating chemical models starting from a given linearized form 143
Tsujinaga K, Hall GG: The currant bun model of simple molecules 257
Tvaroška I, Kožár T: Theoretical studies on the conformation of saccharides. VII. Structure and stereochemistry of α- and β-D-glucopyranose in solution 99

Villar HO, → Stradella OG, et al. 67

Yu H-t, → Li Q-s, et al. 379
